

## What is markdown?

Markdown is a lightweight markup language used to format text using a simple syntax that is easy to read and write. It allows users to style plain text and convert it into structured formats like HTML. Markdown is widely used in documentation, notes, websites, and version control platforms like GitHub.

## What is Linux?

Linux is an open-source, Unix-like operating system that serves as the foundation for a variety of operating systems, often referred to as Linux distributions (or distros). It was originally developed by Linus Torvalds in 1991 and is known for its flexibility, robustness, and security. Linux is widely used in servers, desktop computers, mobile devices (e.g., Android), and embedded systems.

## What is Ubuntu?

Ubuntu is a popular Linux distribution (or distro) based on Debian, known for being user-friendly, stable, and versatile. Developed and maintained by Canonical Ltd., Ubuntu is designed for a variety of applications, from personal desktops to enterprise servers and cloud platforms.
